

Britannia Satellites Skid units

Iseburn were contacted by Conoco Philips to fabricate 9 skid units ranging from 10 tonnes to 140 tonnes over a 12 month construction schedule.

The range of skids gave Iseburn the opportunity to demonstrate our multi-discipline capability, including Structural Fabrication, Pipework, Electrical and Instrumentation skill sets.

Construction at Nigg facility

Structural Fabrication

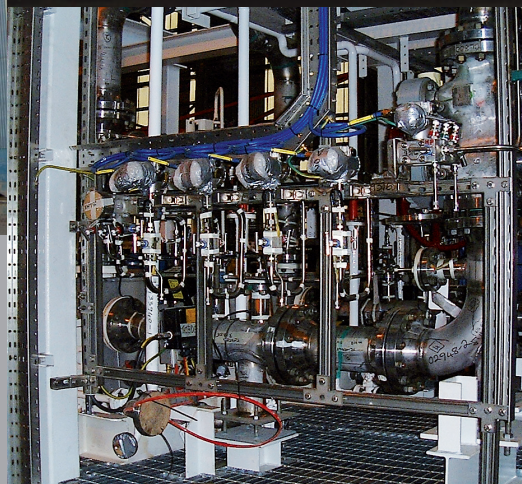

Procurement of structural steel, fabrication, blast and painting

PART OF THE GLOBAL ENERGY GROUP

Electrical & Instrumentation

Scope included electrical installation with control panel builds and the install and testing of small bore piping for instrumentation controls.

Pipework

Receipt of carbon and stainless piping materials and equipment, fabrication, installation, painting, insulation, flushing & pressure testing.

Loadout

Transport from Nigg Workshop and load out to ships at Nigg quayside
